

PHYSICAL REVIEW LETTERS

moving physics forward

Dear Sir or Madam,

We are pleased to inform you that the Letter

Generating single-spike hard x-ray pulses with nonlinear bunch compression in free-electron lasers

S. Huang *et al.*
Phys. Rev. Lett. **119**, 154801 (2017)

Published 10 October 2017

has been highlighted by the editors as an Editors' Suggestion. Publication of a Letter is already a considerable achievement, as *Physical Review Letters* accepts fewer than 1/4 of submissions, and is ranked first among physics and mathematics journals by the Google Scholar five-year h-index. A highlighted Letter has additional significance, because only about one Letter in six is highlighted as a Suggestion due to its particular importance, innovation, and broad appeal. Suggestions are downloaded twice as often as the average Letter, and are covered in the press substantially more often. If Suggestions were a separate publication, they would have an Impact Factor of 14. More information about our journal and its history can be found on our webpage prl.aps.org.

Yours sincerely,

A handwritten signature in blue ink, appearing to be 'H. Chaté'.
